

# Neuledge

An Expressive knowledge-base

# Wisdom of the Crowd

---

Asking a friend what's the most recommended hotel in Amsterdam is usually usually more reliable and faster than searching in Google.

# Information Concentration

---

On the other hand, in certain areas, Google will always return answers from specific websites.

# Neuledge

---

An inline search-engine that will search and display expressive results directly inside the website, making each website as a source of knowledge by it self.

# Sentence Based Searching

---

The search experience is completely different. Instead of searching for articles and pages, the search will be for the most relevant sentences so the answer will be revealed straight from the returned results.

# Lightning Search Plugin

---

An easy to use plugin that web-owners will install on their websites to enable the search on their websites.

# Questions?
